## FIRE & SECURITY

## Our new and improved RX6 Fire Hose Reel Box

With their innovative design, reinforced non-deformable structure and alarm security, the **RX6 Fire Hose Reel Box** is designed and built to provide long lasting protection for fire hose reels making them ideally suited for harsh environments and outdoor applications.

### Why do you need to protect your fire safety equipment?

Fire hose reels located in areas with public access, or kept outdoors, can be vulnerable to corrosion, accidental damage, misuse or vandalism.

Weatherproof and waterproof, the **RX6 Hose Reel Box** is chemical resistant, fully recyclable and UV-stabilised PE.

Made of polypropylene by injection moulding, their solidity and durability is guaranteed to withstand even the harshest conditions.

### Benefits

**Protect hose reels from corrosion** - fire hose reels stored outdoors or in corrosive atmospheres can become unsafe for use or inoperable.

**Prevent accidental damage** - when fire hose reels are exposed to public access there is a risk of accidental damage – and even minor tampering can result in the equipment failing to operate properly when it is required.

**Lockable to prevent theft, misuse or vandalism** - the **RX6 Hose Reel Box** can also be locked to prevent theft, misuse or vandalism.

### Fire Hose Reel Regulations

Fire Hose Reel Regulations require routine and regular checks to be carried out by the responsible person or their representative at suitable intervals, dependent upon the premises risk assessment, to ensure:

- Hose reels are located in their designated place
- They are unobstructed and signage and instructions are legible
- There are no defects, corrosion or leaks
